Meant to help replace the missing RTD bus service, the vouchers are good for one-way rides either direction between Lyons and Boulder or Lyons and Longmont. Vouchers are valid any day of the week, from 5AM to 7PM.

If you have a need for these vouchers, please stop by Town Hall. If you are new to the program contact Lisa Ramsey at 303-823-6622 x30 or email [lramsey@townoflyons.com](mailto:lramsey@townoflyons.com)

## 2022 ECO PASS PROGRAM

Staff have been working with Boulder County and RTD regarding bus service from Lyons to Boulder and the continuation of the Lyons EcoPass program.

The EcoPass program will continue for 2022 and residents who wish to renew or apply for a new eco pass should do so online. The EcoPass is valid on all RTD routes, including buses from Boulder to DIA and/or Denver.

In addition, Boulder County is working towards a solution to replace the Y bus service and anticipates that there will a fixed route with two morning and two afternoon trips beginning in late Spring. More information will be posted and emailed, as the details firm up.

## VACCINE CLINIC

On Saturday, February 12th, the Colorado Dept of Public Health will be in Lyons for a vaccination clinic from 12 pm to 6 pm at the Lyons Regional Library.

They will have both pediatric (ages 5-11) vaccines as well as adult vaccines and boosters (both Pfizer and Moderna).

If possible please register in advance through the [comassvax.org](http://comassvax.org) website.

## ICE BUILD-UP ALONG STREETS

In Lyons it is not uncommon for daytime temperatures to reach into the upper 30s and 40s following a snowstorm, causing the snow to melt quickly. The snowmelt runs down the gutter along the street until it is collected by a storm drain inlet or catch-basin (the opening in the curb) that connects to the underground storm drain beneath the street.

Shaded areas are particularly problematic, as pavement temperatures in shaded areas have been found to be about 20 degrees colder than areas exposed to the sun. When snow in the gutter partially melts, then freezes at night, often on the south side of the street, in the shadow of trees or structures before reaching a storm drain inlet, icing occurs. Thus, repeated partial daytime warming and night-time freezing results in the accumulation of ice along the gutter.
