## EMERGENCY SIREN TESTING

Boulder County has begun testing of the countywide emergency sirens in April. The audible siren tests take place on the first Monday of each month, from April through September and occur twice on each testing day, at 10 a.m. and 7 p.m.

Siren tests ensure that all systems and procedures are working properly during the season of peak flood and fire danger. Should Boulder County experience severe weather during one of the planned audible tests, the siren tests for that day may be cancelled.

## BEARS ARE BACK

With the warming temperatures and warmer weather, bears are coming out, and they will start looking for food and getting into unsecured trash. Take precautions now, locking up trash and other food sources from bears, is important to prevent them from becoming habitually reliant on these sources for food. Bird feeders are also a direct and easy food source for bears. Bears become more of a risk when they associate humans with a food source. Garbage kills bears.
